LOCAL GOVERNMENT COUNCILS' PERFORMANCE AND PUBLIC SERVICE DELIVERY IN UGANDA

Soroti District Council Score-Card Report FY 2013/2014

Authors: Paul Okiring, Benson Ekwee and Dina Atai

BACKGROUND AND RATIONALE

This policy brief presents findings from the 2013/14 assessment of Soroti District Local Government under the Local Government Councils' Score-card Initiative (LGCSCI), an evidence based project implemented by ACODE in partnership with ULGA with support from GAPP/USAID and DGF. It seeks to enhance the effectiveness of elected leaders in fulfilling their mandate and build the citizens' capacity to demand better services and hold their leaders to account. The initiative uses the score-card – an assessment tool to facilitate annual performance assessments on the district council, district chairperson, speaker and councilors with focus on their roles and responsibilities as stipulated in the Local Government Act (as amended).

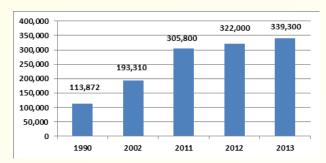

The annual assessment process is conducted by teams of researchers across the 30 districts partaking in the LGCSCI assessment. The research process involves a review of key district documents, interviews with key respondents and consultations with citizens through focus group discussions (FGDs). Following the data collection process, data is cleaned and analysed to identify key themes and patterns wherein a district report detailing the findings is produced for each of the assessed districts (full reports are available online; http://www.acode-u.org/). LGCSCI also produces and disseminates a 'National Synthesis Report' that provides trends analysis for all 30 of the assessed districts. Both reports are disseminated nationally with districts receiving copies of both their specific reports and copies of the National Synthesis Report.

OVERVIEW OF SOROTI DISTRICT DURING FY2013/14

The Council consists of 22 members, 8 of whom are

female and 14 male chaired by Hon. George Michael Egunyu. The council works in close collaboration with the Office of the Resident District Commissioner (RDC) who represents the Presidency in the district. At the national level, the district is represented by three Members of Parliament.¹ The national census conducted in 2002 put the total population of Soroti district at 193,310. With an approximate annual population growth rate of 5.1%, it was estimated that it would grow by up to 60% after 10 years – to 339,300 in 2013,² with estimated 89% living in the rural areas.

Source: UBOS Statistical Abstract 2013.

Local Economy and Potentialities for Development

Agriculture is the predominant activity in the district engaging over 76% of the population. Major crops grown include: millet, cassava, peas, beans, sweet potatoes, simsim, cotton, cabbage, onions, sunflower and rice among others. The district middle aged population has memories of the once vibrant railway system of transport which was a major factor in facilitating their economic activities. Railway transport used to be the region major means of transport for cattle and other agricultural products to markets in Mbale, Jinja and Kampala. Cattle rustling and insurgency from the Lords' Resistance Army (LRA) greatly affected the level

The rich culture of the Iteso manifested in the cultural dances, especially the popular "ajosi dance", dressing and rites, foods and songs is a great tourism potential. There are also handicrafts like pottery and knitting/weaving that have remained unexploited among others.³

Service Delivery in Education, Health Road Sectors

Education: The District has a total of 133 primary schools, 79 of them government aided while 54 are privately owned. In FY 2013/14, the District had a total enrolment of 58,399 representing a rise from the previous year by over 2,000 pupils. A total of 216 pieces of furniture were distributed, 8 classrooms built and 8 rehabilitated under PRDP in 2013/2014. There were teachers recruited during that FY. The district was able to train School Management Committees (SMCs) of 64 schools. The PCR was 1:86 while the DPR was 1:6 leaving about 26,421 pupils sitting on the floor. In terms of PLE performance 137 pupils out of 4,634 passed in Div.1 in 2013.

Health: Eighty percent of the population resides within 5km of the nearest health facility. Deliveries in health facilities performed far above target at 50% against the national average of 35%. The major challenges for the sector included: inadequate accommodation for staff, lack of equipment, including ambulances, nonfunctional solar systems initially provided for lighting and cold-chain for vaccines, staff absenteeism and miss conduct, poor sanitary conditions, and changing patterns of diseases/epidemics among others.

Roads Infrastructure: The District did routine maintenance of 133 kilometers of roads, 11.6 kilometers of Gweri-awaliwal-amukaro road under periodic maintenance, 1.5 km of periodic maintenance, and routine maintenance of 17.4 kms. PRDP funds were used for rehabilitating 2 km road in Asuret. RTI funds were used to remove the bottleneck 3km Opiyai

road while 6.4 km of Soroti-Opiro-Aukot road was rehabilitated. The sector registered low performance compared to other sectors as a result of delays in conducting feasibility study for the low cost sealing of Gweri- awoja road among other challenges.

FACTORS AFFECTING SERVICE DELIVERY IN SOROTI DISTRICT

- a) Budgetary Constraints: The district is still heavily dependent on central government funding, accounting to over 98 per cent of the district revenue. On the other hand, local revenue and donor funds account for less than 2 per cent. Although there was an increase in central government transfers during FY2013/14, they were mainly in form of conditional grants with little or no room for re-allocation to other local priorities. It was noted the district received less funds UGX 12 billion compared to an approved budget of UGX 17 billion creating a funding gap of UGX 5 billion. Thus, some planned activities were not implemented.
- b) Administrative adjustment in NAADS: The NAADS programme had suffered a setback as a result of the administrative adjustments made in the course of the financial year. The involvement of the military in NAADS is well understood in structure in terms of the roles they will play visà-vis the existing production department at the District.

Figure 3: Community Members receiving Turkeys under NAADS

Photo Credit: ACODE Digital Library

c) Low local revenue performance: By the close of the 3rd quarter FY 2013/14 the district had realised UGX16 billions of its budgeted annual Revenue representing 80% performance. Specifically Local revenue amounted UGX 184 million, which was 35% of the expected revenue.4

³ Soroti District Local Government, Soroti District Development Plan 2011/12 – 2015/16, SDLG, 2012

⁴ MoFPED, Uganda Budget Information: Local Government Budget and Performance http://www.budget.go.ug/budget/sites/default/files/Indivisual%20LG%20Budgets/Soroti%20 District%20Q3.pdf 2015 (accessed 27/02/15).

- d) Limited monitoring and supervision: This poor revenue performance impacted negatively on critical activities like monitoring and supervision of key public services. The need for the involvement of political leaders in monitoring services has a high bearing on the quality of services. But this could not be achieved without adequate funding. This means that the oversight function of elected leaders was undermined. As a result, the district continued to experience poor workmanship for instance in the roads sector. This therefore explains why the improvement in performance.
- e) Low capacity of service providers: The low capacity of service providers also contributed to the slow improvement in public service delivery. In the roads sector for instance, the budget allocations could only allow for contracting of small scale contractors who in most cases did not have appropriate skills and equipment and therefore ended up producing substandard works.
- f) Procurement and accountability gaps: Service delivery was further impaired by gaps in the procurement and accountability procedures and practices. Delays in solicitation, award of contracts and completion of contracts is still a big challenge to effective service delivery.
- g) Unspent Balances: Delay in processing of requested for funds under IFMS, Vagaries of weather, uncompleted constructions and supplies for PRDP/PMA and NAADS meant non-payment of available funds.⁵

SCORE-CARD PERFORMANCE

The score-card parameters are derived from the mandate of the organs assessed as stipulated in the Local Governments Act (as amended). While all the four categories are evaluated on their legislative and monitoring functions, the district chairperson, speaker and council are assessed against additional roles. As the political head of the district, the district chairperson is also assessed on their political leadership as well as Initiation and participation in projects in their electoral area. The speaker is assessed primarily as a councilor with an additional responsibility of presiding and preservation order in council. The district council, which is the highest organ in the district, is also assessed against the core function of planning and budgeting as well as providing accountability to citizens.

POLICY RECOMMENDATIONS FOR IMPROVED SERVICE DELIVERY

From the Soroti District Council Scorecard Report, the following recommendations are made:

- 1. Broaden Local Revenue Base: The District to focus more on local economic development should broaden local revenue base to support the local revenue streams.
- 2. Stakeholders should be sensitized on the involvement of UPDF in NAADS: The stakeholders need to be sensitized on the new guidelines for the implementation of NAADS in LGs to avoid role conflict and confusion.
- 3. Improve Civic Awareness and Engagement:
 Citizens need to be sensitized about the statutory
 roles of their leaders in order to hold them to
 account.
- 4. Strengthen Monitoring of service delivery: Individual Councilors, committees of council and the district technical team should increase on frequency of their monitoring of services and provide feedback from such visits.
- 5. Follow-up of identified service delivery challenges: All stakeholders involved in monitoring should ensure that they follow-up on reported service delivery deficiencies from monitoring visits until they are addressed by service providers.
- 6. Clarity of roles in functionality of local Governments: District elected leaders need to understand the boundaries of their roles and responsibilities to avoid unnecessary administrative clashes with the technical team.
- 7. **Need for official communication:** Communication with the different stakeholders in the district should always be in writing for purposes of easier follow-up and reference.

The full report on these findings can be accessed on ACODE's online information center at: http://www.acode-u.org/
